7104 Ohms Lane, Edina, MN 55439

## Nurse Assistant Training Mantoux / Chest X-rays Requirement

**REQUIREMENT:** One Mantoux/TB skin test or chest x-ray (if a positive skin test occurs you must have proof of a positive mantoux for the chest x-ray to be valid) results are required for admission into Nurse Assistant Training Program. You must bring test results to first day of class. – Without mantoux you will be unable to participate in clinicals and may be dismissed from class.

**COSTS** vary from clinic to clinic; some have a sliding-scale fee based on income. If you wish to be billed based on a sliding scale fee, let the clinic know before seeing the doctor. You may not be eligible for sliding scale fee if you do not let them know in advance.

**CHEST X-RAYS** are required for enrollment if you:

- ~ Have been diagnosed with TB or had a recent TB infection.
  - ~ Have had a positive Mantoux/TB skin test in the past.
  - ~ Have been immunized with Bacille Calmette-Guérin (BCG) tuberculosis vaccine.
  - ~ If you have had the BCG shot you still must show proof of a positive Mantoux/TB skin test.
- Chest x-rays are valid for admission no specific date required.

**MANTOUX/TB SKIN TESTS** cost less than chest x-rays, but take 2 appointments to complete one test (within 2 to 3 days).

Mantoux tests taken 3 months prior to date of clinical are valid for admission.

**POSITIVE TEST RESULTS** mean that you will need to take 30 consecutive days of tuberculosis treatment prior to attending clinical.
